

Lab Experiment 1

Design a single page personal portfolio website using incorporate the following HTML & CSS features:

1. HTML Document Structure: `<!DOCTYPE html>`, `<html>`, `<head>`, `<body>`, `<title>`
2. Page Headings and Text: Use of `<h1>` to `<h3>` for sections like Name, Bio, Education and Text formatting: `<p>` `<b>`, `<i>`, `<u>`, `<em>`, `<strong>`, `<mark>`
3. Hyperlinks: External links (e.g., LinkedIn, GitHub), Internal page navigation (e.g., jump to Education, Projects)
4. Images: Profile photo with Image attributes: width, height, alt, title
5. Table: Academic qualifications table, Include headers, rows, rowspan, colspan, and styling
6. Lists: Ordered list for timeline, Unordered list for skills
 - Your web page layout should be like contain website· Main website heading, Header with Tagline or short intro,
 - Section 1: About Me (Paragraph + Image)·
 - Section 2: Education (Table with degree, year etc)·
 - Section 3: Skills (List with styled bullets/icons)·
 - Section 4: Projects (Text + link + optional image)·
 - Section 5: Contact (Email, social media links)
 - Footer: “Made by [Your Name]”
